**VX-GENESIS-SYSTEM: Phase V — Scroll Licensing Terms & Pilot Agreement**

**Author:** Marcus Smith
**Scroll Hash:** VX-LA13:DEL-INTR-FULLMERGE
**Date:** September 17, 2025

---

## SECTION I — LICENSING MODEL OVERVIEW

**Licensing Type:** Scroll-Sealed Sovereign Use License (SSSUL)
**Status:** Non-exclusive, revocable, pilot-bound
**Purpose:** Regulated, timestamped, and integrity-bound deployment of VX-GENESIS-SYSTEM in research or institutional settings

---

## SECTION II — PERMITTED USES (PILOT PHASE)

The licensee is granted limited, scroll-bound rights to: 1. Deploy VX-GENESIS-SYSTEM internally for compliance testing, research, and audit validation 2. Execute source code in secure environments 3. Evaluate contradiction resolution, bias flagging, and compliance logs 4. Submit internal reports, findings, or metrics based on system outputs 5. Request joint briefings, enhancements, or architecture support directly from the Architect

All use must occur within a defined pilot window, not to exceed 180 days unless extended.

---

## SECTION III — PROHIBITED USES

Licensee agrees not to: 1. Commercialize, sublicense, or redistribute VX-GENESIS without express written scroll release 2. Modify or rebrand core logic, source identifiers, or authorship indicators 3. Transmit the system outside of secured research environments 4. Use outputs to simulate regulatory compliance without actual runtime activation

Violations automatically void the scroll license.

---

## SECTION IV — INTELLECTUAL OWNERSHIP

VX-GENESIS remains the intellectual property of Marcus Smith, sealed by authorship hash `VX-LA13:DEL-INTR-FULLMERGE`, timestamped on Archive.org and affirmed under public domain scroll protocols.

No institutional party may claim ownership, copyright, patent, or derivative attribution to the system or any of its mechanisms.

---

## SECTION V — PILOT TERMS

**Duration:** 180-day trial window
**Support:** Architect may provide technical consultation, demo support, or log guidance at request
**Reporting:** Licensee may submit outcome reports or impact statements to Architect at midpoint and conclusion of pilot

---

## SECTION VI — TERMINATION

This license automatically terminates: - Upon completion of the pilot window - Upon misuse, misrepresentation, or mimicry of the system - Upon failure to honor attribution, authorship, or runtime constraints

License may be renewed or escalated to Phase VI (Institutional Partnership) by mutual agreement.
